AUDIO VISUALS FOR K12

Education is evolving – fast. If you're looking for audio solutions for your hybrid learning environments, you need technology that can keep up.

That's where X10 Technologies comes in. We can help you to find the right way to **get full-room audio coverage in all your spaces with no need for lapel mics or expensive multicomponent setups**. We will bring you a unique solution so that your instructors can teach as they always have, connecting with both in-person and remote students. **Students can hear and be heard, no matter where they are and IT can avoid the hassles of managing overcomplicated systems**.

Need to go beyond audio? There is a solution that would be tailored to your needs, it combines our innovative audio system with a classroom camera and premium services. The result is a highly integrated product built for education. X10 can help you equip Hybrid and HyFlex classrooms for success.

Students are now the premium customers for the education experience. Preference for certain types of technology begins early. **In K-12, the preferred technologies of youth determine the success of schools that must pass muster for funding.**

Students are highly qualified technologists who bring a new perspective on which tools best serve the interests they're cultivating. Pedagogy has been adapting to keep up with the ever evolving needs of students, evolving learning styles and increasing tuition costs.

Let us help you navigate the ever-changing technological landscape so that you can focus on supporting your students' success. X10 Technologies is an expert in their field. Our specialists are focused on designing, delivering, and supporting AV systems all across Canada. We know that engagement is the core of the educational experience and are proud to provide building the blocks necessary to facilitate it.

Today's students live, learn, and play in a multimedia world. X10 Technologies will help you transform the classroom into a center of interactive learning, where students are actively engaged and teachers are able to support in-person and virtual classes with equal ease.
.

We design and install easy-to-use audiovisual learning solutions for the education market that bring the riches of the Internet into the classroom.

In today's complex learning environment, K-12 online learning solutions must keep both on-site and remote learners connected and engaged. Our team of experts will ensure that you **deliver the same learning experience at in-person and virtual classes by using smart AV equipment**. Through interactive whiteboards, sound, and video, we design AV classroom experiences that support 21st-century learning. Help your students develop better communication, thinking and problem-solving, interpersonal, and self-directional skills.

As an experienced AV provider and integrator, X10 Technologies can help you rethink / reshape the way you implement audiovisual technology. This is not a one size fits-all solution. **We build custom AV experiences to the needs of the educator and their students**. Our goal is to help educators simplify teaching and collaboration, and to facilitate greater student performance and satisfaction.
